

# Project Planning Phase

## Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	17 February 2026
Team ID	LTVIP2026TMIDS35857
Project Name	Smart Sorting: Transfer Learning for Identifying Rotten Fruits and Vegetables
Maximum Marks	5 Marks

### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	New produce types can be added by updating the dataset and retraining.	USN-1	As a plant head, I want to upload images of products to detect freshness so that I can ensure only fresh items are processed further.	2	High	Rahul, Tejaswari
Sprint-1	Real-Time Sorting Assistance	USN-2	As a plant head, I want instant freshness feedback so that sorting staff can separate unhealthy items quickly.	2	Medium	Ganesh, Yugandhar
Sprint-2	Quality Verification	USN-3	As a supermarket manager, I want to verify the freshness of incoming stock to reduce customer complaints.	2	High	Rahul, Tejaswari
Sprint-3	Mobile Compatibility	USN-4	As a supermarket manager, I want to use the system on my mobile device so that I can inspect stock directly.	2	Low	Ganesh, Yugandhar

### Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	27-Jan-2026	2-Feb-2026	20	27-Jan-2026
Sprint-2	20	6 Days	3-Feb-2026	9-Feb-2026	20	3-Feb-2026
Sprint-3	20	6 Days	10-Feb-2026	16-Feb-2026	20	10-Feb-2026

#### Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

#### Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
